Multivariable Calculus with Applications to the Life Sciences

Apr 16, 2015 · The expression in (26) defines a vector-valued function of a single variable, t . As t varies, the image of the function defined in (26) traces a curve in three dimensional space, as pictured in Figure 212 This curve is an example of a parametrized curve, and this is where we begin our study of the topics from Multivariable **Calculus** ...
