BASIC CONCEPTS OF LOGIC - UMass

Inductive logic investigates the process of drawing probable (likely, plausi-ble) though fallible conclusions from premises Another way of stating this: induc-tive logic investigates arguments in which the truth of the premises makes likely the truth of the conclusion Inductive logic is a very difficult and intricate subject, partly because the

Natural Deduction

such a clear manner that many logic presentations employ sequent calculi The laws governing the structure of proofs, however, are more complicated than the Curry-Howard isomorphism for natural deduction might suggest and are still the subject of study [Her95, Pfe95] We choose natural deduction as our definitional formalism as the purest

Chapter 1 - The Guide to Processing Personnel Actions

a Nature of Action (1) The nature of action (NOA) is the phrase that explains the action that is occurring (such as "appointment" or "promotion") Each nature of action has a unique numerical code that identifies, for statistical and data processing purposes, that particular nature of action Each time a table directs you to enter a
