DESIGN AND SIMULATION OF THREE PHASE RECTIFIER WITH ...

The three phase rectifier with power factor correction is a method to improve the power factor near to unity, reduces harmonics distortion noticeably and automatically corrects the distorted line current It will replace the Passive Power Factor Correction (PPFC) which has become a conventional method for the past 20 years This research aims to

Thyristor three-phase rectifier/inverter Figure 103 shows the diagram of a thyristor three-phase rectifier/inverter Observe that the circuit topology is the same as that of a power diode three-phase full-wave rectifier, except that all diodes are replaced with thyristors Using

THREE PHASE VIENNA RECTIFIER FOR WIND POWER ...

interface is three phase three switch, three levels VIENNA rectifier The rectifier control scheme proposed in this paper ensured a unity power factor at the source input This implies that the input current is both sinusoidal and in-phase with the input voltage, assuming that the input voltage is also sinusoidal
